Techni**C**a Innovations Private Limited provides end to end global product engineering services in the in Electronics, Electricals, Mechanical, Software, Hardware, components, Research & Development and all the activities pertaining to information technology, Artificial Intelligence, Robotic Technology. The company has operations in the states of Karnataka, Kerala, Tamil Nādu including [United States of America](#) and South East countries.

TechniCa Innovations Private Limited company was started in 2021 by a group of professional having the team spirit to achieve its goals. The company made its first acquisition in 2020 by integrating Artificial intelligence, Medical Engineering and software testing, but later it was incorporated in Registrar of Companies, Bengaluru. The company incorporation was very successful by undergoing its own project oriented with software, hardware, software testing, and solution providers in field of electronic and electrical surfaces.

Founders Message

TechniCa will be one of India's best IT garage start-ups, founded by an enthusiastic women and highly talented professionals in 2022 but was developed by the hard work from 2020 and is proud of its views, goals which will have a role at almost every inflection point in the IT, Artificial intelligence, Electronic and Electrical sector and is assured of reaching greater heights as it moves into the future. We aim at providing high quality products by facilitation of knowledge, skill and attitude development of our talented team fellows which is imperative for success.

The main objects of the company are

To carry on the business as Importer, Exporter, Buyers, Lesser, Seller and dealers in Electronics, Electricals, Mechanical, Software, Hardware, components, Research & Development of software and hardware and all the activities pertaining to information technology, Artificial Intelligence, Robotic Technology and to obtain IT, Electronic, Electrical related contracts in India and abroad.

We TechniCa Innovations Private Limited is an also vertically service provider specializing in Project Management, Constructions, Program Management. We believe to effectively contribute and provide impactful service to our clients, we must take a holistic approach to any assignment informed by broad research encompassing to any assignment.

Well informed by broad research encompassing critical theory and history TechniCa Innovations embraces a multiplicity of Perspectives, proposing a distinct notion of innovations that is by hybrid Global Approaches. We connect people to opportunities in expanding the understanding of our planet and the people within it.

Our Vision:

To become the leader of technology providers in India and abroad. We want to empower and fulfill our client's expectations through our innovative thoughts and technology.

Our Mission: -

There's this notion that to grow a business, you have to be ruthless. But we know there's a better way to grow. One where what's good for the bottom line is also good for customers. We believe businesses can grow with a conscience, and succeed with a soul and that's why we at TechniCa has created an ecosystem uniting software, education, and community to help businesses grow better every day.

Growth

One of the most valuable things we the TechniCani'nas learned from the company we dealt are behavioural science theories that shape and impact of organizations. Most companies fail not because of a poor product but of a poor company culture. When an organization's culture and leadership are not embodied from top to bottom, goals and people become misaligned.

Our TechniCa have a tremendous ability to bring change and uplift lives, it may be time to revisit how our company views its bottom line.

Our Bottom Line

Thinking about our company's bottom line — the social and environmental outcomes in addition to economic outcomes — not only ensures financial stability but also safeguards your sustainability in the long run.

Our bottom line theory expands business success metrics to include three bottom line categories based on sustainability of people, planet and profit. Companies that embrace this consider how their businesses affect people — their employees and the communities they support, and their environmental impact — from their carbon footprint to their usage of resources, down to waste management.

Finance Management

Cash flow is essential, and businesses still need to generate income. But it does mean our company needs to have a social purpose, alongside measuring your financial bottom line .

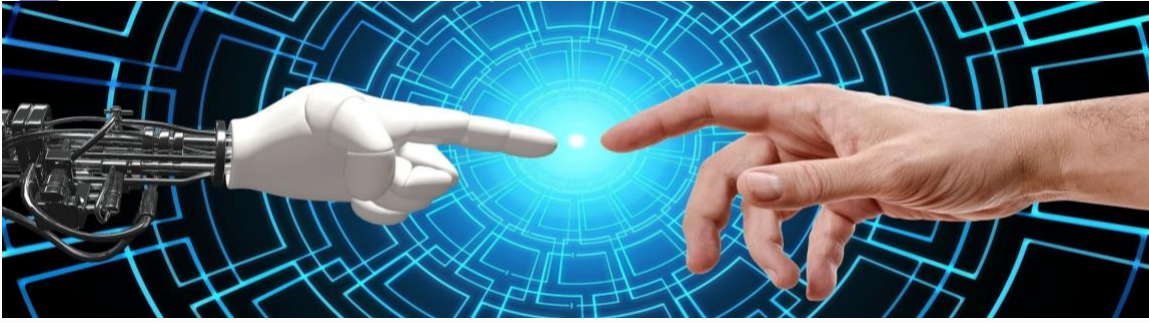

How good are TechniCa

At a time when we gently stared all privacy regulations, security and data ethics are growing concerns around the world, TechniCa is in a unique company incorporated by the views of many professionals bringing positive and lasting change, while targeting business goals. Our Moto is to provide business relations with high standard, Quality ,time persuasion.

In our case, we have committed to maintaining TechniCa as an ethical IT company. We have committed to using all best sources by demonstrating real use cases of our technology, such as in Electronics , Electricals , Mechanical, Software , Hardware , components , Research & Development of software and hardware and all the activities pertaining to information technology, Artificial Intelligence , Robotic Technology , and to obtain IT , Electronic , Electrical related contracts in India and abroad which among these can be channelled towards the greater good.

TechniCa's Power

Our business' success is based on our high profile people. Sixty percent of our costs are in people, and we make sure that we provide them with equitable benefits, aside from their compensation. In Nanjungud we have procured a land measuring 21 acres at Industrial hub bravely known as Kadakola Industrial area (A Massive area allocated by Karnataka Industrial Development Corporations, Karnataka) in which we are putting up constructions for starting up our company training environment centres , We have also procured another industrial land in the NH 212 very closer to Mysore Domestic Air terminals for having our incorporated office with staff and stake holders guest house for a adding spike for a stress free environment Moreover we have already procured a full-fledged farm with all well grown flora of 30 years contributing ourselves for a stress free environments taking care about the environment friendliness of stake holders

and our employees. Hence our motive is to Empower smart people rich in resources and give them the latitude to come up with many ideas. Our part of culture is to try and build new products and platforms, push them out digitally, see how they get leveraged, then see what happens and importantly, utilize our existing solutions to address pressing issues that affect society to achieve our goal .
