**De Care**
Software Solutions

About Us

We are a group of people who believe that computing power can be used to comfortably capture & organize data, and analyse it to the highest level of accuracy, and reproduce it in a sensible way, to get a clear picture of the scene, to communicate and set directions.

Letting the computer to handle this tedious, boring and repetitive, (For People) but very important area of data capture and analytics can reduced stress on employees making them more human towards colleagues and customers.

So we founded Data and People Care. In short, De Care. We builds affordable software's which precisely serves the purpose.

We started our operations in the year 2000 from TBI , NIT (formerly REC) Calicut, Kerala with sponsorship of Government of India National Science and Technology Entrepreneurship Development Board. As years passed by, we moved to software capital Bangalore.

Innovation + Knowledge = Solution > Confirm > Install
1. Understand
2. Solve
3. Train
4. Support
De Care Products
De Care Operation Model
Understand in detail, the requirements of client.
Detailed on Job training to the satisfaction of the clients staff
24 X 7 Support to resolve issues and doubts

Our journey taught us that there should be an operation strategy, so as to bring Uniformity & Consistence in our operations. From our learnings of the past and the predictions of the future, we evolved the circle on the right side. 4 equally important quarters, 1) Understand, 2) Solve, 3) Train and 4) Support. This is how we operate.

Solutions

In our journey we happened to make few of the people happy with our solutions. A glimpse is given below.
